

## Instructions to the Authors

[About the Journal](#) | [Submission of Manuscripts](#) | [Preparation of Manuscripts](#) | [Types of Manuscripts](#) | [Appendix I](#) | [Checklist for submission of articles to IJAMR](#) | [Contributors' form](#)

About the Journal

**International Journal of Advanced Medical and Health Research**,(IJAMHR) is a research-based publication of JIPMER, an Institute of National Importance that advances or illuminates medical science, published twice a year. It is a peer-reviewed, online, open access, international journal that takes articles from all over the world. The criteria for publication is that manuscript should represent a substantial advance in medical science or medical practice in terms of – its originality and novelty, should be of importance to researchers/ practitioners in the field as well as outside the field, and should have adopted a rigorous methodology with conclusion justified by the data presented, with adherence to the highest ethical standards. The journal's full text is available online at [http:// www.ijamrjournal.org](http://www.ijamrjournal.org). The journal allows free access (Open Access) to its contents and permits authors to self-archive final accepted version of the articles. **The journal does not charge for submission, processing or publication of manuscripts and even for color reproduction of photographs.** The print copy will be available on demand and will be charged.

The IJAMR publishes peer reviewed quality biomedical research in the form of original research articles (basic research, clinical and surgical), review articles, editorials, perspectives, commentaries, symposia, rapid communications, health system research, students' research, medical ethics, historical aspects, dispatch (case reports), correspondence, images/ videos in clinical practice and book reviews from around the world. The special issues may be published with an invited editor. The local ethical committees should ethically clear papers involving humans and animals.

Why publish with this journal- it will result in a fast communication with the outcome of professional peer review available within 4 weeks, online early publication within 2 to 4 weeks, and the publication will be free of charge on the net for wider dissemination.

Manuscript Preparation - Manuscript should be prepared in accordance with the Guidelines set by the International Committee of Medical Journal Editors (ICMJE) as "ICMJE Recommendations, formerly the Uniform Requirements for Manuscripts" submitted to biomedical journals and should be submitted online through manuscript submission system (articles through email and in print will not be considered for publication) with digital images (each image of 1 to 4 MB as JPEG file preferably). Abstract should be structured for original articles (of about 250 words) under the subheadings of Background, Aims and Objectives, Methods, Results, and Conclusions, whereas, for review articles the abstract need not be structured. For detailed information see the recent issue of the journal.

Submission of Manuscripts

Type the manuscript following the instructions mentioned below under 'Preparation of manuscript' and submit it online through the web-site <http://www.journalonweb.com/ijamr>. All manuscripts received online are automatically acknowledged by e-mail which mentions tracking article number for future reference. In case you do not receive acknowledging e-mail, please resubmit the article. Do not send articles by e-mail or post. The progress of a manuscript through the editorial process can be subsequently tracked by authors on the web-site. The copyright form, covering letter and other documents mentioned in Appendix I below should be either uploaded as supplemental files at the time of submission or sent to the Editorial office (within 15 days of the online submission) at the following address:

Dr. DM Thappa  
Editor-in-chief, IJAMR,  
Professor-in-charge and Head, Faculty Publications,  
Department of Dermatology and STD  
Jawaharlal Institute of Postgraduate Medical Education and Research (JIPMER)  
Pondicherry – 605 006 INDIA

Manuscripts are sent to at least two independent reviewers without revealing the identity of the contributors. A small number of papers are rejected after the editorial review when editors deem that the paper is not appropriate for this journal. Authors may suggest the names and e-mail addresses of one or two reviewers who have had some experience in the subject of the submitted manuscript but who are not affiliated to the same institute as the authors. Authors will be informed about the reviewers' comments and acceptance or rejection of their manuscript within four to six weeks. Galley proofs will be e-mailed to the corresponding author and need to be returned within three days. Corrections received after that period may not be included. The editors reserve the customary right to style, to abridge the article to ensure clarity and conciseness and to decide the time of publication. There are no charges for submission,

processing and publication of manuscripts, including color images. Reprints are not free and should be requested in a reprint request form that will be sent with the acceptance letter. Print copy of the journal may be availed of on demand and will be charged.

## Preparation of Manuscripts

Manuscript in incorrect format may result in rejection. Manuscript text should be submitted in word (.doc, .docx), rich text format (.rtf) or PDF (.pdf) format.

Please be consistent. The same elements should be keyed in exactly the same way throughout the manuscript:

1. Prepare the manuscript using MS Word, Times New Roman 12 font, with double line spacing for A4 size paper with a 1 inch margin on all sides.
2. To change paragraph in text, press ENTER. Do not indent the paragraph by pressing TAB.
3. The space bar should only be used as a word separator. Use TAB when indenting paragraphs or separating columns in tables.
4. Enter only one space after the full-stop at the end of a sentence.
5. Do not use the lowercase l for 1 (one) or the uppercase O for 0 (zero).
6. Do not type headings or any other text in ALL CAPITALS.
7. Do not use the software's facility for a header, footer or footnotes.

A manuscript should be divided into the following two files:

1. **First page file:** This document should carry the covering letter on its first page and the title page on the second page as per the following format: 1. Title of the article; 2. Short running title of not more than 90 characters; 3. Names of all contributors (first name, middle name initial, and surname in that sequence), highest academic degrees, and their professional affiliations; 4. Word count (text only, exclusive of title, abstract, references, tables, and figure legends); 5. Number of figures; 6. Number of tables; 7. Statement of conflict of interest; 8. Sources of support if any; 9. Address for correspondence - the name, address, phone numbers and email address of the corresponding contributor and 10. Acknowledgment if any. The corresponding author should promptly inform the editor of any change in e-mail id or mailing address.
2. **Article file:** This should have the main article manuscript without any identifying information about authors or their affiliations. The article file should have sections of Abstract, Key words, Introduction, Methods, Results, Discussion, References, Tables, Illustrations (drawings only; do not embed the images in the text file as these have to be submitted separately online) and Legends for illustrations in that order. For detailed information, please refer to the website- [http:// www.ijamrjournal.org](http://www.ijamrjournal.org) or the current issue.

Download a PowerPoint presentation on common reference styles and using the reference checking facility on the manuscript submission site.

**Tables:** Authors should exercise particular care in the preparation, notation and description of tables and figures. Tables should be included in the article file document. Make self-explanatory tables that do not duplicate the text. Number tables in Arabic numerals consecutively in the order of their first citation in the text and supply a brief title for each. Place explanatory matter in footnotes, not in the heading. Explain in footnotes all non-standard abbreviations. Obtain permission for all fully borrowed, adapted, and modified tables and provide a credit line in the footnote. For footnotes use the following symbols, in this sequence: \*, †, ‡, §, ||, \*\*, ††, ‡‡

**Illustrations:** Sketches/flow diagrams should be included in the article file document (MS Word). Clinical and histopathology photographs should be uploaded online simultaneously at the time of submission of the manuscript (after scanning if printed) as JPEG files preferably of a size less than 4 MB each. Please follow necessary instructions on the journal website. Type legends (maximum 20 words) for illustrations/figures using double line spacing. Use Arabic numerals for numbering illustrations and should be referred to in the text as "Figure". For histopathology photographs, please mention the magnification scale and the method of staining. Legends should also be incorporated in the article file after the references. Illustrations must be cited in the text and numbered in the order of mention.

The journal reserves the right to crop, rotate, reduce, or enlarge the photographs to an acceptable size.

For clinical photographs, either the subjects must not be identifiable or their pictures must be accompanied by written permission to use the photograph. If a figure or table has been published before, acknowledge the original source and submit written permission from the copyright holder to reproduce the material. A credit line should appear in the legend for such figures.

**Please note that the high resolution images (resolution not less than 1200 X 2400 pixels and preferably of the JPEG type, at least 1 MB in size, maximum of 4 MB each) can now be uploaded at the time of original submission itself. If images submitted at the time of original submission are of low resolution, on acceptance of the article, high resolution digital images (resolution not less than 1200 X 2400 pixels and preferably of the JPEG type, at least 1 MB in size, maximum of 4 MB each) can be uploaded in the**

pre-acceptance phase, otherwise, the images can be emailed ([images@medknow.com](mailto:images@medknow.com)) or sent on a CD.

Types of Manuscripts

All submitted manuscripts would be subjected to screening and there would be a zero tolerance for manuscripts that demonstrate any evidence of unattributed "cutting and pasting" also called as plagiarism. The IJAMR strongly discourages duplication/reduplication of data already published. If and when duplication is detected after publishing in IJAMR, the journal will be forced to 'retract' such articles. Copyright permission should be obtained from the copyright holder in advance if a published Table/Figure is included.

Articles are accepted in the following sections (all word limits exclude abstract and references):

- **Editorials:** These are usually solicited, contributed by editorial board members, but unsolicited material may also be considered (approx. 1000 to 1200 words). A maximum of 12 references may be included. Editorials should normally not have tables and figures.
- **Perspective:** A perspective of 500-1000 words length, with approximately 5 references. The author may express his or her opinion without complete documentation. No abstract is required.
- **Reviews:** Systematic critical assessments of literature and data sources of about 3000 words should be submitted after consulting the Editor regarding the subject, but unsolicited material will also be considered. Authors should preferably be working in and have published papers in the area being reviewed and have sufficient expertise to critically evaluate relevant literature. Add an unstructured abstract of 250 words, with key words. Please add 10 multiple choice questions (MCQs) with four options based on the review article.
- **Commentaries:** Short commentaries based on original articles will be encouraged from reviewers. It should be of 500-1000 words length, with approximately 5 references. The author may express his or her opinion. No abstract is required.
- **Original articles:** This includes reports of original research (including trials, studies of diagnostic tests or surveys) that are up to 2500 words in length (excluding references and abstract). Please write a structured abstract (including 5 headings: Background, Aims, Methods, Results, Conclusion) of not more than 250 words and add key words (3-5 words). The article should follow IMRAD (introduction, methods, results, discussion), may include acknowledgement if any, and references. Double blind controlled trials must conform to the revised CONSORT statement and this is available from editorial office or at the website <http://www.consort-statement.org>. We encourage reports of diagnostic tests to be accompanied by the STARD flow diagram and checklist ([www.clinchem.org/cgi/content/full/49/1/1](http://www.clinchem.org/cgi/content/full/49/1/1)), reports of meta-analyses of randomized trials to be accompanied by the QUOROM flow diagram and checklist ([www.consort-statement.org/QUOROM.pdf](http://www.consort-statement.org/QUOROM.pdf)), and meta-analyses of observational studies to be accompanied by the MOOSE checklist ([www.consort-statement.org/MOOSE.pdf](http://www.consort-statement.org/MOOSE.pdf)). Observational studies in epidemiology should follow STROBE guidelines available on <http://www.strobe-statement.org>. Registration of clinical trials is desirable. Permission from ethics committee/ Institutional Review Board (IRB), statement of sources of support and conflict of interest is mandatory. IRB approval must be mentioned in the "methods" section of all manuscripts. Short reports of preliminary studies may be submitted for the category of Brief reports.
- **Dispatch:** Reports of an unusual manifestation of a disease or a new disease (1000 words and up to 10 references) should be submitted with photographs. An unstructured abstract of not more than 200 words should be submitted along with 3-5 key words. The article should include introduction, case report(s), discussion and references.
- **Rapid communications:** This refers to a new piece of information which may have impact on day-to-day practice. It should be of 500-1000 words length, with approximately 5 references. No abstract is required.
- **Health system research:** These articles discuss any issue related to healthcare, which may have important social, economic or political dimensions (approx. 2000 words). No abstract is required.
- **Medical ethics:** Articles dealing with ethical aspects of practice of medicine or medical research in world. Legal issues in medicine can also be highlighted in this section (approx. 2000 to 2500 words). No abstract is required.
- **Images/ videos in clinical practice:** This section (no more than 500 words in length) has 2 parts - first paragraph including brief history, examination, and relevant investigations to arrive at the diagnosis and 2nd paragraph will discuss the finding being given due importance relevant to the case. No references need to be cited for the text and at the end. The manuscript submitted in this section can have a maximum of three authors. A video related to the procedure or technique may be uploaded.
- **Correspondence:** These should normally be no more than 750 words in length, may have up to 5 references and a maximum of three photographs. There are no sub-headings within the letter.
- **Historical aspects:** An article (up to 2500 words in length) on the history of specialty, diseases, also a biographic account of a historic or noteworthy figure in basic research, medicine and surgery. No abstract is required.
- **Students' research:** Aimed to encourage and promote the participation of students in medical research, this new section is started exclusively for medical undergraduate students. This section would also include reports of important scientific developments that will impact patient care, public health and/or career advancement. Opinion pieces from students also can be considered. The length of the papers should not be more than 1000 words. No abstract is required.
- **Symposia:** A cluster of review articles focused on a particular subject will be published in place of review articles. These articles will not carry any MCQ questions.
- **Announcements:** Announcements of conferences, meetings, courses, awards, and other items that are likely to be of interest to readers should be submitted with the name and address of the person from whom additional information can be obtained (up to 100 words).
- **Book Review:** Please send two copies for book reviews along with a print or high-resolution digital photograph of the front cover.
- **Supplements:** Supplements undergo peer review and are processed in the same fashion as regular submissions to the journal. Enquiries about proposed supplements should be directed to the editor before submitting the supplement.

- For formatting your articles, have a look at the recent issue of IJMR.

### References:

In citing other work, only references consulted in the original should be included. Use the sequential numbering system. Personal communications should not be cited in the reference list but may appear parenthetically in the text. Arrange the reference list in the sequence in which the references are first cited. In the text, references cited should be superscripted and should appear on top of the line after the punctuation. Check all references for accuracy and completeness.

The journal follows the Vancouver system of references.

b>Format for references:

List the first six authors followed by et al. List the Surname, followed by the initials, for each author; the title of the paper; journal title (abbreviated according to the style of Index Medicus [ [www.nlm.nih.gov](http://www.nlm.nih.gov) ]; in case the journal is not listed in the Index Medicus, the full journal title should be given); year of publication; volume number; first and last page numbers. Please observe the inter-punctuation most carefully.

### Examples of references:

#### For journal articles:

Rose ME, Huerbin MB, Melick J, Marion DW, Palmer AM, Schiding JK, et al. Regulation of interstitial excitatory amino acid concentrations after cortical contusion injury. *Brain Res.* 2002;935(1-2):40-6.

#### For books:

Hunt TK, editor. *Wound healing and wound infection: theory and surgical practice.* New York: Appleton-Century-Crofts; 1980.

#### For chapters in books:

Lever WF, Schaumberg Lever G. Pityriasis rubra pilaris. In: Lever WF, Schaumberg Lever G, editors. *Histopathology of the skin.* 7th ed. Philadelphia: JB Lippincott; 1996. p. 176-8.

#### For electronic media:

Health Sciences Library, University of Buffalo, NY. Available at <http://ublib.buffalo.edu/libraries/units/hsl/infores/biomed.htm> (accessed on 12 Nov 2004).

**Abbreviations:** Abbreviations should be avoided in the title and abstract. A term or a disease must be spelt out at first mention, with the abbreviation following in parentheses in the text file.

N.B. In case of any doubt, please refer to "ICMJE Recommendations, formerly the Uniform Requirements for Manuscripts" for biomedical journals at the web page [www.icmje.org](http://www.icmje.org) or in the *Annals of Internal Medicine* (*Ann Intern Med* 1997; 126:36-47) for more detailed guidelines.

Appendix I

**Covering letter and other documents:** A covering letter (signed by all authors), stating the title of the paper and the following points, and accompanied by the relevant documents, wherever applicable should be submitted as supplemental file at the time of submission or should reach the editorial office within 15 days of submitting the manuscript online.

**Authorship:**All the authors have contributed enough towards this publication to justify authorship criteria.

**Copyright:**We transfer all copyright ownership of the enclosed manuscript to the International Journal of Medical Research if it is accepted for publication. We warrant that this paper is original and has not been in part or in whole simultaneously submitted to or published in another journal. It may be downloaded from the website, printed, duly filled, scanned (reduced to a size less than 400 KB for uploading) and uploaded directly from the "Article cycle" in the author's manuscript submission area.

**Sources of support:**For studies, add 'This study was supported (or not supported) financially or otherwise (specify) by .....

**Conflict of interest:**There is no conflict of interest of any of the authors with the results of this study. In case conflict of interest exists, please elaborate.

**Ethics committee / Institutional review board's permission:**We also declare that the study was assessed and approved by the institutional ethics committee / institutional review board and that the letter of approval is available with us for examination. Please attach a copy of the approval letter. A scanned copy of the same can be uploaded as supplemental file.

**Permission:**Copy of permission(s), if any, to reproduce published material is enclosed. A scanned copy of the same can be uploaded as supplemental file at the time of submission.

**Patient's consent:**The patient's consent to use photographs that may reveal the identity of the patient is enclosed. A scanned copy of the same can be uploaded as supplemental file at the time of submission.

Checklist for submission of articles to IJAMR

For online submission:

1. Prepare first page file as per instructions to authors
2. Prepare article file including legends to photographs. Do not include author names or affiliations or correspondence address in any part of the article file.
3. Label digital images or scanned photographs- as jpeg or tiff files of less than 4MB each.
4. Register as an author at the web-site [www.journalonweb.com](http://www.journalonweb.com) (not needed if you have registered earlier).
5. Follow instructions for submission in your work area.
6. Fill up the copyright form, and upload the same from your website area.

Contributors' form

**(to be modified as applicable and one signed copy attached with the manuscript)**

Manuscript Title:

---

I/we certify that I/we have participated sufficiently in contributing to the intellectual content, concept and design of this work or the analysis and interpretation of the data (when applicable), as well as writing of the manuscript, to take public responsibility for it and have agreed to have my/our name listed as a contributor.

I/we believe that the manuscript represents valid work. Neither this manuscript nor one with substantially similar content under my/our authorship has been published or is being considered for publication elsewhere, except as described in the covering letter. I/we certify that all the data collected during the study is presented in this manuscript and no data from the study has been or will be published separately. I/we attest that, if requested by the editors, I/we will provide the data/information or will cooperate fully in obtaining and providing the data/information on which the manuscript is based, for examination by the editors or their assignees. Financial interests, direct or indirect, that exist or may be perceived to exist for individual contributors in connection with the content of this paper have been disclosed in the cover letter. Sources of outside support of the project are named in the covering letter.

I/We hereby transfer(s), assign(s), or otherwise convey(s) all copyright ownership, including any and all rights incidental thereto, exclusively to the International Journal of Advanced Medical and Health Research, in the event that such work is published by the International Journal of Advanced Medical and Health Research. The International Journal of Advanced Medical and Health Research shall own the work, including

1. copyright;
2. the right to grant permission to republish the article in whole or in part, with or without fee;
3. the right to produce preprints or reprints and translate into languages other than English for sale or free distribution; and
4. the right to republish the work in a collection of articles in any other mechanical or electronic format.

We give the rights to the corresponding author to make necessary changes as per the request of the journal, do the rest of the correspondence on our behalf and he/she will act as the guarantor for the manuscript on our behalf.

All persons who have made substantial contributions to the work reported in the manuscript, but who are not contributors, are named in the Acknowledgment and have given me/us their written permission to be named. If I/we do not include an Acknowledgment that means I/we have not received substantial contributions from non-contributors and no contributor has been omitted.
